

Johnson Emmanuel Olamilekan

Software Developer · Blockchain Engineer · IT Support Technician
emmanuel.johnson.ox@gmail.com | (+234) 8100214313 | Lagos, Nigeria | [Portfolio Website](#)

PROFILE

Software and Blockchain Developer with hands-on experience designing Decentralized Applications and Smart Contracts. Skilled in building secure, scalable systems across the full stack, with a focus on integrating blockchain solutions into real-world products. Passionate about leveraging emerging technologies to solve complex problems.

EXPERIENCE

Software Developer 2026 – Present
DFW LLC

- Engineered modern web apps, automated workflows, and scalable backend services, boosting system efficiency.

IT Support Technician Mar 2025 – Aug 2025
Makro Ltd.

- Resolved hardware, software, and network issues across first and second-line support, reducing downtime by 30%.
- Deployed and maintained 200+ computers, printers, and peripherals across the organization, ensuring 99% uptime.
- Administered user accounts, permissions, and access controls across Active Directory and internal IT systems, ensuring secure and compliant access.
- Executed routine OS updates, patches, and antivirus maintenance to bolster system security and stability.
- Administered LAN/WAN networks, VPNs, and internet connectivity while maintaining IT asset inventories and helpdesk logs to ensure 99.9% uptime.
- Collaborated with senior IT staff on infrastructure projects, escalating complex issues to accelerate resolution.

Software & Blockchain Developer 2024 – Present
Personal Projects · GitHub

- Developed interactive, responsive web projects using HTML, CSS, and JavaScript, prioritizing design and user experience.
- Deployed Ethereum smart contracts on testnets with Solidity, Hardhat, and Remix, integrating Chainlink Functions and CCIP for cross-chain experimentation.
- Designed CryptoVerse, a Web3 trading simulator with \$100K demo funds and multi-chain support across 5 networks.

Virtual AI Data Annotator Dec 2022 – Jun 2024
Transsion Holdings

- Curated and optimized training datasets to boost virtual assistant model accuracy and response quality.
- Applied QA techniques to ensure dataset reliability, collaborating cross-functionally to maintain 100% accuracy across deliverables.

EDUCATION

BSc. Computer Science Apr 2023 – June 2026
Federal University of Agriculture, Abeokuta (FUNAAB)

Blockchain Development - Smart Contracts, Solidity & DeFi Protocols Nov 2025 – Present
Cyfrin Updraft

SKILLS

Languages & Frameworks HTML · CSS · JavaScript · TypeScript · Solidity · Node.js · Ethers.js
Blockchain & Web3 Ethereum · Hardhat · Remix · Chainlink · CCIP · wagmi · RainbowKit
Tools & Design Figma · Webflow · VS Code · Cursor · Antigravity · GitHub · Vercel · Canva

FEATURED PROJECTS

Developer Portfolio *HTML · CSS · JavaScript · GitHub API* - GitHub-style dashboard with live API data, contribution heatmap, and terminal glassmorphism aesthetic.

CryptoVerse *Next.js · Solidity · Hardhat · Prisma · wagmi* - Web3 trading simulator with \$100K demo funds and multi-chain support across 5 networks.

AutoChain *TypeScript · JavaScript · CSS* - A platform that automatically detects the blockchain of a wallet address to prevent asset loss.

SafeChat *Python · Docker · JavaScript · CSS* - AI-Based toxic comment detection platform using RoBERTa.
